### Pickleball Doubles Ladders:

The format of play is designed so that players play mostly with others of similar skill levels. Your ranking on a ladder is based upon your winning points percentage (the ratio of points won to total points available). Players will move up or down the ladder based upon their winning points percentage. The results of the 7 weeks of play will be used for this calculation. Games are played to 15 points. First team to reach 15 points wins. Each week, players will be placed in groups of 4 in the order of their ranking on the ladder for match play. Join skill level 3.5 and below ladder or 3.5 and above ladder. If your skill is at 3.5 level, you decide.
